

More than just key management.

- **Easy creation and maintenance of digital certificates**
 - **Professional key management to ensure confidential e-mail communication**
 - **Reliable validity monitoring for all certificates**
 - **Ideal supplement to securiQ.Crypt: Centralized encryption and easy key management without an expensive public key infrastructure (PKI)**
- Assumes the tasks of a Trust Center.
 - Creates x.509 certificates according to own company guidelines.
 - Monitors the validity of x.509 certificates (CRL lists).
 - Creates separate public and private keys.
 - Efficient use together with securiQ.Crypt.
 - Offline administration tool independent of mail platform.
 - Supports use of Smart Card devices.
 - Supports RSA until 4096 bit.
 - Supports ECC until 256 bit.
